

UCL

ChangeMakers:

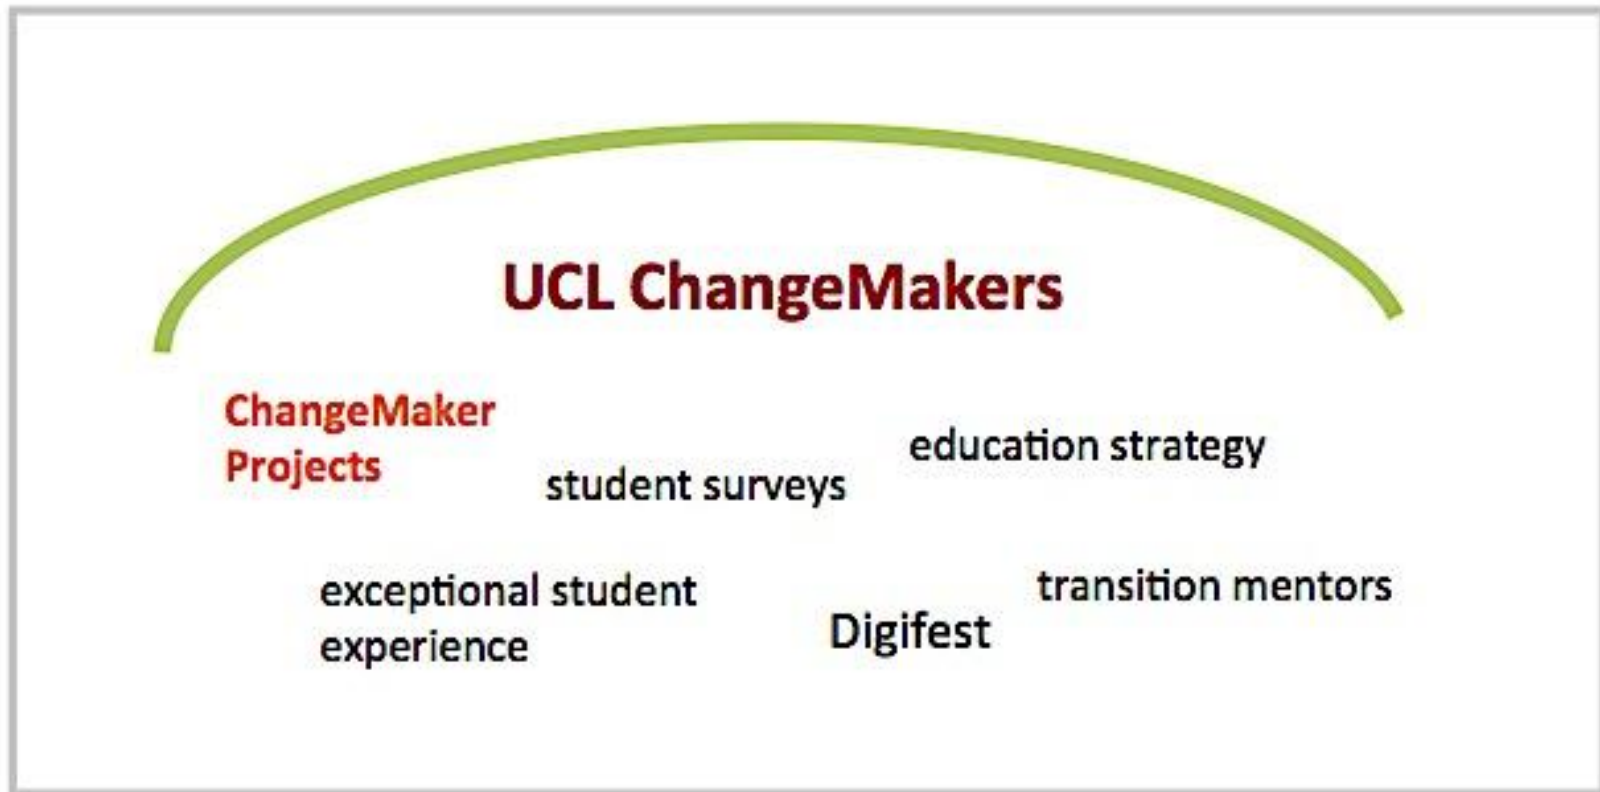

Be part of the change

Abbie King, Student Engagement Officer, CALT
Programme Lead: UCL ChangeMaker Projects

Let's get straight to it:

What is it? And Why is it different?

Change: we're already all about it

So, once again, how is it different?

- The **process** of change
- The **nature** of the relationship that enables change to take place
- It's about **working together**
- Direct **action** and **ownership** of ideas/projects/issues

Where are we now?

ChangeMaker Projects

- Students working with a staff partner on a project to investigate and implement a change to enhance or improve the ‘student experience’
- £500 funding, some for you
- Vehicle for StARs
- 12 (approx) projects include: careers info, module choice database, language exchange, teamwork

The background is a vibrant blue with a textured, brush-stroke appearance. It is filled with numerous small, black silhouettes of birds in flight, scattered across the scene. Three large, soft, white clouds are positioned around the text, each with a subtle, swirling pattern. The text "Blue Skies Ahead" is written in a highly decorative, cursive calligraphic font. The word "Blue" is at the top, "Skies" is in the middle, and "Ahead" is at the bottom. The letters are white with a light blue gradient and have long, elegant flourishes that trail off into the background.

Blue
Skies
Ahead

Discussion:

It's all about you

StARs:

- What would be useful for you that would make your jobs as students reps easier?
 - Where have you made change and what made it possible?
 - Where did you want to make change but couldn't, and why do you think that was?

And if you are not a student rep:

- How would you want to make a difference at UCL and how can we help make that happen?

Next steps:

Ways you can get involved now

- Contact:
changemakers@ucl.ac.uk
- Looking for student co-researchers to explore the concept and process of change (interviews and write ups)
- Student project to create a digital tools database using video tutorials
