

# Faculty Representatives Termly Report

2017-18

---

**Your Name: Mona Ahmed**

**Your Faculty & Role: MAPS / MAPS Faculty Representative**

## Faculty Priorities:

From my experience as a student and speaking to other students lecture cast is an issue. I haven't met with department Reps yet, but I'm assuming each department will have their own needs and problems to be addressed.

## Meetings in the Faculty:

I've attended a meeting with MAPS faculty staff at the start of term in which we were introduced to the MAPS faculty staff and discussed our concerns as Faculty Reps. My main concern was regarding the Maths department's lack of lecture cast. A member of staff said they will contact the head of department regarding the issue. The second meeting I attended was with the faculty and library staff in which we discussed the new laptop borrowing system and the changes they were making on the science library. I inquired about the possibility of providing chargers for the library laptops, which they said might happen depending on the demand for the service.

## Meetings with the Union:

**I found the Faculty Rep Forum to be a good space to discuss any issues and concerns regarding UCL students such as assessment, choosing modules deadlines and personal tutors. Especially that the Education officer and the postgraduate officer are present in these meetings, it helps to have that student representation to make sure our concerns are being listened to and dealt with.**

## Other comments:

I encourage students to approach their Faculty and Department Reps with any concerns they might have as they've undertaken these roles to ensure students get the education and experience they desire at UCL.
