

Policy Proposal

Title: International Students' Officer Membership for All Zones

Policy Zone to be discussed at: Union Executive

1. What would you like the Union to do?

To grant membership rights to the International Students' Officer at all zones including Union Executive.

2. Why would you like to do this?

Considering the significant involvement of the network and the officer in academic, welfare, and social life of international students on campus, it is important for them to be included in key decision votings conducted in these zones.

3. How will this affect students?

International student interests will be represented in all decisions even outside of Welfare Zone and the officer will stay informed on any policy decisions or policy ideas that come up across these zones. While attending without membership helps, the UCL international student body of 20000+ students demands its own vote in the democratic structure of the Students Union.
