

Policy Proposal: Clear Policy on Supervision Duties of Research Students

Proposed by: Julian Laufs

To be discussed at: Education Zone

What would you like the Union to do?

Lobby for a clear policy on the rights, duties and responsibilities of research students with regards to (lab) supervision of UG and PGT students.

Why would you like to do this?

Many students are not aware of their rights and their responsibilities with regards to supervising UG and PGT students. In several instances, students were told to supervise students without adequate compensation. In addition, these duties can add significantly to the already heavy workload of research students and thus create problems for their studies. Many students feel that it could jeopardise the relationship with their supervisor if they refuse requests. A clarification and set guidelines in this regard are much needed.

How will this affect students?

Students will have more clarity with regards to their duties and supervisors will be less likely to propose unpaid or unwanted supervision.
