

# Vote for **Will Raderman**

## as Faculty Rep for Population Health Sciences

As Faculty Rep, my major goals will be to:

1) Push for UCL to both **completely divest from fossil fuels and to focus university investments on clean energy solutions.**

(In order to protect the global population's health, we must be doing everything we can to combat climate change.)

2) Advocate for buildings at UCL to **rely on solar power.**

3) Work to help **eradicate food insecurity** faced by students at UCL.

4) Advocate for **optional module schedules to be posted months in advance of the academic year,** so prospective students can understand what combinations of courses they can actually choose.
